

## Customer Instructions Gas Chain Saw

*Every chain saw we rent goes out with  
a very sharp brand new chain!*

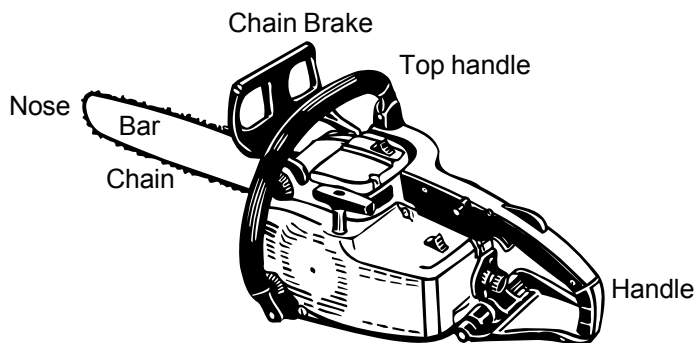

**Warning:** Chain Saws can be dangerous. Use safety goggles, gloves, ear protection, protective clothing. (Heavy, long sleeved shirt, long pants, boots) Helmet & chaps are recommended.

**Warning:** Use only special fuel mix provided. Customer is responsible for all damage to equipment.

### Operating Instructions

1. Be sure to use the fuel mix provided. Do not use straight gasoline, it will destroy the engine.
2. Be sure to keep the chain oil reservoir full. This will keep the chain from binding and breaking.
3. Start saw on the ground by holding the top handle with one hand and holding saw down with foot in the handle.
4. Avoid touching the nose of the bar to the wood - this will cause the saw to "kickback" causing very serious injury to the user.
5. Avoid touching the chain to dirt, embedded material or metal in the wood - this will dull the chain and make the saw useless.
6. Always use both hands to operate the saw.
7. Do Not run saw with chain brake on - damage to saw will occur.
8. If working in harsh conditions, take an extra chain to the job.

#### Disclaimer:

*These instructions are intended as a helpful reminder. They do not replace the full operating instructions found in the owners manual, which is available at the rental counter.*
